How to Price Snap

Snap pricing is module-based and follows a simple sequence.

- 01 Choose a Snap room size to determine the number of modules.
- 02 Select a finish tier for the wall modules.
- 03 Add door modules — same tier pricing.
- 04 Add the ceiling system if desired.
- 05 Add shipping based on total module count.

■ Total room cost = (Wall Modules + Door Modules) + Ceiling System (optional) + Shipping.

Rooms specified without a ceiling do not include lighting, power distribution or ventilation.

Choose a Snap Room Size

Snap rooms follow a 3-foot planning grid. Each 3-foot section of wall equals one module, which determines the total wall module count used to calculate pricing.

ROOM SIZE	MAX WALL MODULES	MIN DOOR MODULES	TOTAL MODULES
6' × 6'	7	1	8
6' × 9'	9	1	10
6' × 12'	11	1	12
6' × 15'	13	1	14
9' × 9'	11	1	12
9' × 12'	13	1	14
9' × 15'	15	1	16
12' × 12'	15	1	16
12' × 15'	17	1	18
15' × 15'	19	1	20

Door modules replace wall modules within the total module count. Multiple doors may be specified per room. Door modules are only available with inset panel finishes.
