CHISEL

Decrease the noise, increase the design

We know space division can be acoustic - but can it also be artistic? We think so. That's why we designed Chisel, a family of patterns that are cut into our acoustic panels and placed in our most popular product, Framewall.

ACOUSTIC, VISUAL AND TERRITORIAL PRIVACY

The unique properties of the acoustic material and the varied Chisel patterns combine to solve the three core privacy problems in the modern office. Minimize visual distractions, give yourself space to think, and let Chisel absorb some of the chatter about Chad's weekend plans while you get to work.

ORDER A SAMPLE KIT

With many finishes available, our sample kits are the best way to experience Chisel before purchasing. They're free to order and ship out this week. Just scan the QR code to get started!
