

PARALLEL

The most flexible way to divide your desk.

LOFTWALL

Desk dividers have always been missing something. Some were acoustic, some were writable, some were tackable, some were magnetic, and some were repositionable. But none were everything. Well, until now.

Meet Parallel. It's everything.

WAIT, I DON'T SEE HOLES. HOW DO THE PANELS ATTACH?

Magnets! With magnets embedded in the acoustic core, Parallel panels attach without any drilling or screwing. With no power tools needed, repositioning the panels is as simple as sliding them along their bracket's axis!

HOW CAN IT BE ACOUSTIC, TACKABLE, AND MAGNETIC?

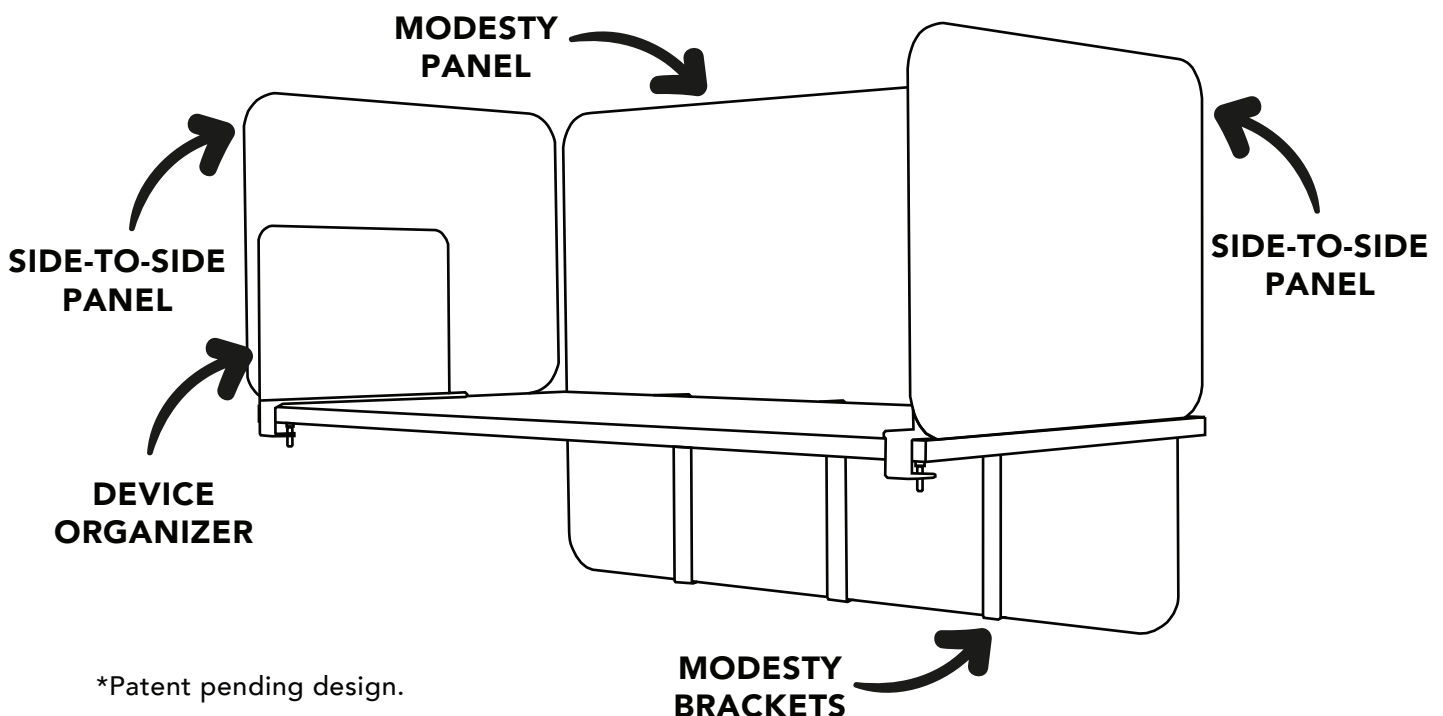

And writable! Don't forget that. How we do it though? Design.

Our 0.75" thick acoustic panels are strong enough to absorb noise but soft enough to be punctured by a thumbtack.

And for a final touch, we coat our steel brackets in a dry erase finish. Come on, you know that's slick.

THE BREAKDOWN

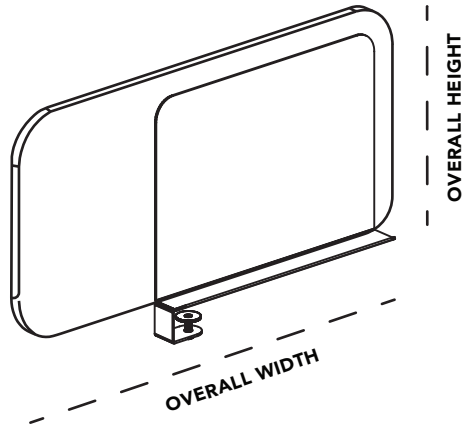

*Patent pending design.

SIDE-TO-SIDE

INTERIOR VIEW

EXTERIOR VIEW

MODEL NAME	Low Height Side-to-Side	Full Height Side-to-Side
DESIGNED FOR	Any worksurface	
OVERALL HEIGHT	15"	24"
OVERALL WIDTH	30"	30"
HEIGHT ABOVE WORKSURFACE	15"	24"

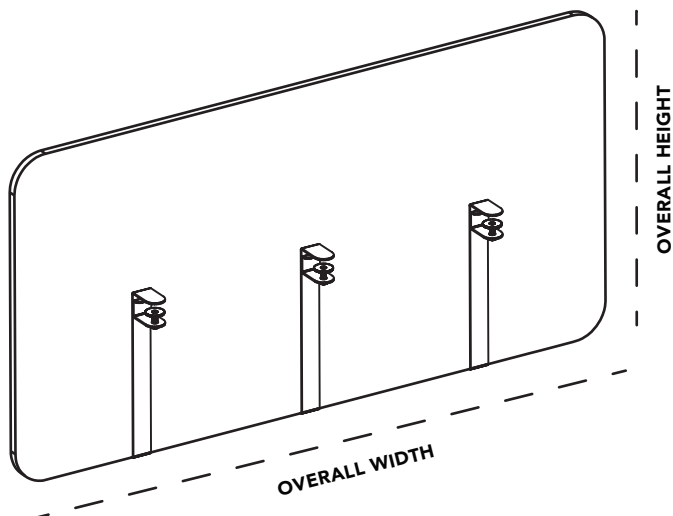

COOL DESIGN FEATURE:

In addition to having a dry erase finish, our bracket was designed to be a device organizer. Whether you need to jump on a quick FaceTime or just want to see who's texting you, your device is ergonomically angled and easily accessible.
