

How to Price Snap

Snap pricing is module-based and follows a simple sequence:

1. Choose a Snap room size to determine the number of modules
2. Select a finish tier for the wall modules
3. Add door modules (same tier pricing)
4. Add the ceiling system if desired
5. Add shipping based on total module count.

Total room cost = **(Wall Modules + Door Modules) + (Optional) Ceiling System + Shipping**

Note: Rooms specified without a ceiling do not include lighting, power distribution, or ventilation.

Choose a Snap Room Size

Snap rooms follow a 3' planning grid. Each 3' section of wall equals one module, which determines the total wall module count used to calculate pricing.

Room Size	Maximum Wall Modules	Minimum Door Modules	Total Modules
6' x 6'	7 modules	1 module	8 modules
6' x 9'	9 modules	1 module	10 modules
6' x 12'	11 modules	1 module	12 modules
6' x 15'	13 modules	1 module	14 modules
9' x 9'	11 modules	1 module	12 modules
9' x 12'	13 modules	1 module	14 modules
9' x 15'	15 modules	1 module	16 modules
12' x 12'	15 modules	1 module	16 modules
12' x 15'	17 modules	1 module	18 modules
15' x 15'	19 modules	1 module	20 modules

Note: Door modules replace wall modules within the total module count. Multiple doors may be specified per room. Door modules are only available with inset panel finishes.
